**STEINWAY LYNGDORF IS DEDICATED
TO MAKING THE WORLD'S BEST
SOUND SYSTEMS.**

Steinway Lyngdorf delivers high performance digital sound systems that combine design artistry and the finest craftsmanship with perfected technology. Founded by Peter Lyngdorf and based in Denmark, Steinway Lyngdorf is the result of a visionary ambition and uncompromising commitment – a shared dream which brings together Steinway & Sons, makers of the world's finest pianos for over 160 years, and Peter Lyngdorf, one of the most forward-thinking audio innovators of our time.

RETHINKING EVERYTHING

In 2005, audio innovator Peter Lyngdorf, on a mission to create absolute perfection in sound reproduction, founded a revolutionary sound system research and development company in Denmark. Lyngdorf brought to this new venture his experience in conceiving some of the most significant audio breakthroughs in history, including the world's first fully digital amplifier. In a re-imagining of digital acoustic compensation, RoomPerfect™ premiered the following year, together with a next-generation fully digital amplifier. With these foundations, the stage was set for a groundbreaking collaboration that would change the course of audio history.

A PROMISE OF PERFECTION

In 2007 Steinway Lyngdorf made a history-making partnership with Steinway & Sons. Following the new partnership, Steinway Lyngdorf released the Model D Music System, a legendary product which represents the pinnacle of audio and design prowess. The partnership was based on an ambitious promise—that these audio systems would reproduce the sound of a Steinway & Sons grand piano to the degree that even seasoned concert pianists could not discern the difference.

EVER EXPANDING, NEVER TIRING

Steinway Lyngdorf, founded on research and forward-thinking, continues to achieve advances in sound technologies such that the world has never known. To answer the demand for a high-performing cinematic and music system, the LS Concert was released in 2012 and was greeted with across-the-board praise.

REPRESENTING THE LATEST DEVELOPMENT

In 2015, the release of the Model P200 surround sound processor set a new standard for immersive sound. The Model P200 provides full support of every audio format available, including Dolby Atmos®, DTS:X, and AURIO-3D—each of which represents the latest developments in immersive surround sound.

INVISIBLE.

Aesthetics oriented solutions from Amina technologies have been winning awards world over for simplicity in installation and maintenance.

Custom Installations

ENSEMBLON specializes in the field of custom audio-visual installations, with projects ranging from single rooms to whole house media distribution, networking and automation.

the benchmark for **luxury** seating

unique aesthetic design

Design is not just a fashion instrument for CINEAK, but a corporate philosophy and a management tool. All of our award-winning designs are innovative, timeless and distinctly different than others.

custom-built in belgium

All of CINEAK products are hand-built and finished at our ISE-9002 certified facility in Belgium by the best artists and crafts people in the industry. Our facility specializes in custom-built capabilities, so modifications to the design and materials can be made to meet an individual's requirements.

handcrafted with the finest materials

All CINEAK products are made with the highest-grade, quality materials. (Italian/Austrian leathers, German motors and drivers, steel mechanisms, high-density foams, etc.) The use of such materials results in a high-end, exclusive product which guarantees years of comfort and enjoyment. Our products are available in a wide- variety of luxurious leathers (ex. Elmo, Boxmark, etc.), designer fabrics (ex. Alcantara, Armani Casa, Lelievre, Sahco etc.) or customer supplied upholstery.

ACOUSTICAL DESIGNER FABRIC

Most decorative wall upholstery fabrics are not made with the home theater in mind. They are too dense to allow sound to reach the acoustical treatments or speakers behind them. Our designer-friendly, specially-woven and tested collection of acoustical fabrics features a wide variety of exciting design patterns and colors and can be used safely over both acoustical treatments and speakers. CINEAK's collection of acoustical transparent fabrics features 7 unique design patterns, each pattern is available in 6 to 12 different color patterns. All fabrics have been acoustically tested and have passed the requirements and expectations of some of the most-respected acousticians in the world.

All fabrics are a 100% Polyester, come in 54" width and pass CA Technical Bulletin 117, Section E.

Delight > Ecstasy

ENSEMBLON offers you a complete home experience, with F&B service of your choice.

Spend as much time as you want listening to music / watching movies of your choice till you know what's magic to your eyes and ears.
